New online tool helps patients manage their health

Dynacare is committed to finding innovative ways to improve the quality of patient care.

After a successful pilot in Quebec, we are launching our easy-to-use consumer health portal in Ontario.

Dynacare Plus helps minimize confusion over lab tests and results by providing patients with:

- Secure online access to lab test results – 24x7
- An easy-to-understand visual format
- Additional descriptions for many commonly ordered tests

Patients are able to:

- Track results over time
- Securely store personal health information such as appointments, medications and vaccines
- Search for curated information on diseases and conditions, nutrition, fitness and stress management

Test results are posted one day after they are final in our LIS and made available to you. Please note that patients must be 16 years or older and certain categories of tests, including some sensitive tests, are not available.

If you or your patients would like more information, or you would like to contact us, please visit DynacarePlus.com.

Thank you for your support!

Renee Leventhal
Director Physician Relations, Ontario
