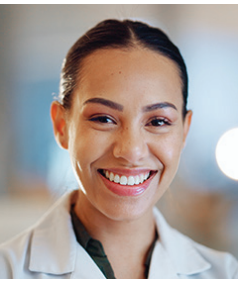
Dynacare® A Health Solutions Company + MYANT HEALTH

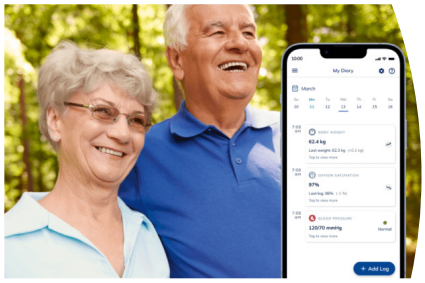
Revolutionary Textile-Based Holter Monitoring

The next generation of Holter Monitoring – designed to improve detection and patient comfort.
Textile-based Holter Monitoring is revolutionizing cardiac diagnostics – replacing wires and sticky electrodes with comfortable, wearable clothing that patients can live in for 14 days.*

Why Switch to Textile-Based Holter Monitoring?

Longer Monitoring, Better Detection	Easy for Physicians	Best Patient Experience
Detect more arrhythmias than before[1]	Simply refer patients with the Myant Health Holter requisition	Wear it like regular clothing, easily for 14 days





Benefits of Textile-Based Cardiac Monitoring

Longer Monitoring, Better Detection
- Captures arrhythmias often missed in 24-72 hr Holter studies[1]
- Easily capture 14 days of continuous data,** summarized into 1 report
- Greater comfort means longer wear, leading to more powerful diagnostics

Simple for Physicians
- Order through the Myant Health Holter requisition; no additional processes needed
- Faster Results, delivered in 1 simple report
- More data means more diagnostic yield

Easy for Patients
- Patient-friendly, worn like regular clothing
- 1:1 patient support throughout the study
- 100% covered by OHIP for eligible patients

* Device must be removed for showering and charging

** Interruptions in data will occur if the patient takes off the device, charges the unit, or if there is a disconnection for any reason.

How It Works

Dynacare, in partnership with Myant Health, have developed a patient-centric Holter service designed for convenience and clinical quality:

1. **Physician Referral**
   Order through the Myant Health Holter requisition
2. **Patient Support**
   Patient receives 1:1 support throughout the study, from set up to completion
3. **Results Delivered**
   Get 14 days of continuous data in 1 simple and familiar report**

1. Physician completes the Myant Health Holter requisition
2. Dynacare sends the requisition to Myant Health
3. Myant contacts the patient to coordinate device delivery
4. Patient receives the Holter kit and is guided through setup by Myant's Care Team
5. Patient completes the study with ongoing support from Myant Health
6. Certified Cardiac Technician reviews the collected data
7. Study sent for reporting by Cardiologist/Electrophysiologist and final report sent to Referring Physician

Contact your Dynacare representative to get started today!

Holter Study and services are provided by Myant Health. **Any questions or request for results** must be directed to Myant Health: clinicalsupport@myant.ca or 1.844.501.0252
Kindly be advised that Dynacare has no information about the Holter test or its results.

* Device must be removed for showering and charging

** Interruptions in data will occur if the patient takes off the device, charges the unit, or if there is a disconnection for any reason.
