February 12, 2015

Dear Client:

We are pleased to inform you that Gamma-Dynacare Medical Laboratories has entered into an agreement to acquire the business and operations of Curalab, a leading provider of medical laboratory services in the Montérégie region of Quebec.

Gamma-Dynacare is one of Canada's largest and most respected medical laboratories, with more than 50 years of experience serving Canadians. We are a national health care services provider, with a significant presence in Quebec that includes our medical diagnostics laboratory in Saint-Laurent, the Laval-based operations of GD Specialized Diagnostics (which provides specialized laboratory testing services to clients across Canada), and the operations of Lab Bio-Medic, which Gamma-Dynacare acquired in January 2014. In addition, we operate an extensive network of 200 Patient Services Centres nationwide, including 35 in the Montreal, Outaouais and Quebec City areas.

We are very excited about our acquisition of Curalab, which demonstrates Gamma-Dynacare's commitment to investing in and growing our services in Quebec.

Curalab and Gamma-Dynacare are fully committed to ensuring a smooth and seamless transition for our clients. During the next few weeks, we will be working together on a customer transition plan, designed to ensure that all customer-specific requirements are understood and a well-managed business transition is facilitated. Our goal is to complete all integration and transition activities by the end of March.

Concurrently, Gamma-Dynacare is planning to transfer the testing currently being performed at our Lab Bio-Medic facility in Quebec City to our facility in St. Laurent by the end of March and from our Lab Bio-Medic facility in Montreal by the end of June. The consolidation of these laboratory operations will enable us to serve our valued clients more efficiently and effectively, with one common set of testing, reporting and operating procedures.

Looking ahead, as we integrate the operations, we look forward to making an even greater contribution to your practice and the care of your patients through access to Gamma-Dynacare's broader test menu and our ongoing investment in leading-edge technologies.

We will keep you advised as our plans progress. In the meantime, clients are encouraged to continue to coordinate activities through their usual Curalab and Gamma-Dynacare contacts. Should you have any questions, or should you wish to discuss any aspect of this initiative, please feel free to contact either of us directly.

Sincerely,

Denis Bessette
