Dynacare closing Laboratory and Health Services Centre at **100 Colborne St. W, Orillia, ON**

As you are aware, there are significant and increasing pressures on Ontario's healthcare system. The effect of our aging population and ongoing fiscal constraints require that all providers review their delivery of service with a sharpened focus on improving quality of care while maximizing cost effectiveness and sustainability.

Accordingly, we at Dynacare must continually evaluate our operations to ensure alignment with this Ontario-wide directive. We have conducted a recent review of our Laboratory and Health Services Centres in Ontario with a focus on patient access.

As a result, we will be closing our Laboratory and Health Services Centre at 100 Colborne St. W, Orillia, ON effective Friday, February 19th, 2016.

Alternative MOHLTC Licensed Specimen Collection Centres are located at:

16 O'Brien St. Orillia (300 m NW)
210 Memorial Ave., Orillia (1.2 km S)

As always, we are committed to best serve our customers and partners, to ensure we provide the highest value to our healthcare system. Should you have any additional questions, please contact Customer Care at **800.565.5721**.
