“Dynacare – Net Check In” Coming to Quebec

Dynacare is committed to finding innovative ways to improve the quality of patient care. This summer, we are bringing our electronic check-in solution, Dynacare – Net Check In to Quebec.

Dynacare – Net Check In is helping our patients access lab services quickly and conveniently across Ontario and Saskatchewan. Wait times are minimized by joining the line for lab services through a mobile app or online, at no cost, before they arrive at the lab. Reducing wait times is one of the most effective ways to improve overall patient satisfaction, and help encourage patients to get their lab work done.

To make the Quebec launch successful, we need your help! When providing your patients that would like to use our Private laboratory with a Lab requisition, please mention the following:

- Dynacare – Net Check In can help reduce their wait times significantly
- The service is free and easy-to-use. There are two ways to access it:
 - o Download the Dynacare – Net Check In app for iPhone and Android
 - o Visit Dynacare.ca and use the “Find a Location” tool

If you would like more information about Dynacare – Net Check In, including information sheets for your patients, please contact Customer Care at 800.565.5721.

Thank you for your support.

Janic Marotte
Directrice, Opérations
