Test Preparation Instructions: It is recommended that SARS-CoV-2 Antibody testing not be performed until at least 14 days post symptom onset or following exposure to individuals with confirmed COVID-19. False negative results may occur if the specimen is collected too soon following infection or is collected from immunocompromised patients. If patient is symptomatic, consider testing with a molecular COVID-19 test.

Lab Instructions: Specimen processing at Brampton Laboratory, 115 Midair Court, Brampton, ON L6T 5M3.

SARS-CoV-2 Antibody Test Panel: Information for Patients
