### PHYSICIAN INFORMATION

1. Complete the patient section of this requisition.
2. Provide the patient with **both** the **DynaLIFE** Third Party Harmony and the Dynacare Harmony Prenatal Test Requisitions.
3. Ensure the patient is familiar with the section below.

### PATIENT INFORMATION

- APPOINTMENT CRITERIA** Collections can only be made **Monday – Wednesday and before 12 noon on Thursday** (excluding statutory holidays) Must be at **least 10 weeks gestational age** at the time of collection.
1. Appointments **MUST** be booked by phoning the Customer Call Centre at 780-702-4486. Ensure your appointment meets the above bolded criteria.
  2. Complete the payment section on the Dynacare Harmony Prenatal Test Requisition prior to your laboratory appointment.
  3. Bring the ① **DynaLIFE** Third Party Harmony Prenatal Kit Requisition, the ② **Dynacare Harmony Prenatal Test Requisition** and the completed ③ **Dynacare Payment Authorization Form** to your laboratory appointment.

### DL LAB STAFF INSTRUCTIONS

- SPECIAL NOTES**
- Use the Harmony Collection Kit Stored on-site
  - Patient must be of at least 10 weeks gestational age at the time of collection
  - Collect Monday through Thursday only - samples collected on Thursday **MUST** be shipped on day of collection

#### DATA ENTRY

Number	Procedure Description
LAB71878	Third Party Collection/Handling Fee
LAB71886	DL Third Party Packaging Fee

#### COLLECTION

1. Verify the expiration date on the kit before proceeding with collection.
2. Indicate date and time of collection on both this requisition and the Dynacare Harmony Prenatal Test requisition.
3. Collect and label the required samples using the tubes and instructions provided in the kit; no further processing is required.

**Monday thru Wednesday:** If collection occurs after your sites courier cut-off time, store samples ambient and ship the following regular business day. Do NOT ship on Friday, weekends or holidays.

#### SHIPPING

1. Package and ship the samples to **#115 Midair Court, Brampton, ON L6T 5V1**, using the prepaid waybill and kit box. Ensure both the completed Dynacare Harmony Prenatal Test requisition and Dynacare Payment Authorization Form are included in the shipment.
  2. Send the **DynaLIFE** Third Party requisition to Base Lab using your regular Company (CO) billing procedures.
- ? Questions regarding collection / handling should be directed to Dynacare Genetics and Specialty Services @ 1-888-988-1888.**

**This requisition is valid at DynaLIFE Patient Care Centres only**

### TEST MENU OPTIONS

- Harmony Prenatal Test (T21, T18, T13)
- Additional options:
- Fetal Sex
  - Monosomy X<sup>1,2</sup>
  - Sex Chromosome Aneuploidy Panel<sup>1,2</sup>
  - 22q11.2<sup>1</sup> (additional cost for this option)

<sup>1</sup>Singletons only. <sup>2</sup>Fetal sex not reported.

### CLINICAL INFORMATION

**Gestational age:** complete **A** or **B**

**A** Gestational age at date of ultrasound: \_\_\_\_\_ weeks \_\_\_\_\_ days

Date of ultrasound: \_\_\_\_\_  
Year                      Month                      Day

**B**  LMP Date; or  
 IVF Transfer Date

\_\_\_\_\_  
Year                      Month                      Day

# of Fetuses  1  2

IVF Pregnancy  No  Yes

↳ Egg Donor is:  Self  Non-self

Donor Age at Retrieval: \_\_\_\_\_ years

### CLINICIAN SIGNATURE

I attest that my patient has been fully informed about details, capabilities, and limitations of the test(s). The patient has given full consent for this test.

Clinician Signature \_\_\_\_\_

Date \_\_\_\_\_ Licence No. \_\_\_\_\_  
Year / Month / Day

## Patient Informed Consent

The Harmony® Prenatal Test is a prenatal screening test that analyzes cell-free DNA (cfDNA) in maternal blood. The test provides a risk assessment, not a diagnosis, of fetal chromosomal or genetic conditions, and fetal sex determination. Consider Harmony results in the context of other clinical criteria. Follow up confirmatory testing based on Harmony results for Trisomy 21, 18, 13, sex chromosome aneuploidy, or 22q11.2 could reveal maternal chromosomal or genetic conditions in some cases. Results from the Harmony Prenatal Test should be communicated in a setting designated by your healthcare provider that includes the availability of appropriate genetic counselling.

The Harmony non-invasive prenatal test is licensed in accordance with Health Canada regulation requirements for a class III license. The Harmony test is based on cell-free DNA analysis and is considered a prenatal screening test, not a diagnostic test. Harmony does not screen for potential chromosomal or genetic conditions other than those expressly identified in this document. All women should discuss their results with their healthcare provider who can recommend confirmatory diagnostic testing where appropriate.

### Who is eligible for the Harmony Prenatal Test?

Patients must be of at least 10 weeks gestational age for any of the Harmony Test offerings. Patients with a twin pregnancy are not eligible for monosomy X, sex chromosome aneuploidy or 22q11.2 options. The Harmony Prenatal Test is not for patients with a history of or active malignancy; a pregnancy with fetal demise; a pregnancy with more than two fetuses; or a history of bone marrow or organ transplants.

### What are the limitations of the Harmony Prenatal Test for Trisomies 21, 18, and 13, sex chromosome aneuploidy, and fetal sex determination?

The Harmony Prenatal Test is not validated for use in pregnancies with more than two fetuses, fetal demise, mosaicism, partial chromosome aneuploidy, translocations, maternal aneuploidy, transplant, malignancy, or in women under the age of 18. Harmony does not detect neural tube defects. Certain rare biological conditions may also affect the accuracy of the test. For twin pregnancies, HIGH RISK test results apply to at least one fetus; male test results apply to one or both fetuses; female results apply to both fetuses.

Not all trisomic fetuses will be detected. Some trisomic fetuses may have LOW RISK results. Some non-trisomic fetuses may have HIGH RISK results. False negative and false positive results are possible. A LOW RISK result does not guarantee an unaffected pregnancy due to the screening limitations of the test. Harmony provides a risk assessment, not a diagnosis, and results should be considered in the context of other clinical criteria. It is recommended that a HIGH RISK result and/or other clinical indications of a chromosomal abnormality be confirmed through fetal karyotype analysis such as amniocentesis. It is recommended that results be communicated in a setting designated by your healthcare provider that includes appropriate counselling. For a variety of reasons, including biological, the test has a failure rate. As such, you may be requested to redraw a new sample. In a small number of cases, a result for fetal sex and/or sex chromosome aneuploidy determination may not be obtained. This can be due to biological and technical factors influencing sex chromosome analysis that did not impact trisomy analysis.

Note: Options for Fetal Sex, Monosomy X, and Sex Chromosome Aneuploidy Panel can only be added up to a maximum of 30 days following initial reporting.

### What are the limitations of the Harmony Prenatal Test for 22q11.2?

In addition to the limitations discussed above, the 22q11.2 option is not validated for use in pregnancies with more than one fetus or for women with a 22q11.2 duplication or deletion.

A 22q11.2 deletion may not be detected in all fetuses. Due to the limitations of the test, a LOW PROBABILITY result does not guarantee that a fetus is unaffected by a chromosomal or genetic condition. Some fetuses with a 22q11.2 deletion may receive a test result of LOW PROBABILITY. Some fetuses without the 22q11.2 deletion may receive a test result of HIGH PROBABILITY. In cases of HIGH PROBABILITY results and/or other clinical indications of a chromosomal condition, confirmatory testing is necessary for diagnosis.

Note: The 22q11.2 test is not part of the Health Canada approval of the Harmony Prenatal Test and is performed at a CLIA approved laboratory in the United States. **This test must be requested at the time of the order and cannot be added after submission of the original test requisition/specimens.**

### What is done with my sample after testing is complete?

No additional clinical testing will be performed on your blood sample other than those authorized by your healthcare provider. Dynacare will disclose the test results only to the healthcare provider(s) listed on the front of this form, or to his or her agent, unless otherwise authorized by you or as required by laws, regulations, or judicial order. Details on Dynacare's policies and procedures governing patient privacy and health information, including patient rights regarding such information, can be found at [www.dynacare.ca/privacy-policy.aspx](http://www.dynacare.ca/privacy-policy.aspx).

Your specimen will be tested in Canada, however, in some cases your sample may be sent to a laboratory in the United States for testing. In this case, personal information, including but not limited to name and date of birth, will accompany the sample. Personal information held in countries outside of Canada could be subject to disclosure to government or other authorities (whether of that country or of another country).

HARMONY is a trademark of Roche.

### Patient Instructions for Sample Collection

To know the location of the nearest collection centre, call us at **888.988.1888** or visit **[dynacare.ca](http://dynacare.ca)**. You also have the option of having your sample collected in the comfort of your own home at no extra charge.\* One of our specially trained medical technicians will come to your home to perform the blood draw. To book your home collection appointment, contact Dynacare at 888.988.1888.

\*Depending on distance, additional charges may apply.
